THERMO KING

Thermo King is the world leader in providing ultimate customer assurance through precise transport temperature control. Thermo King manufactures transport temperature control systems for a variety of mobile applications, including trailers, truck bodies, buses, shipboard containers and railway cars. It owns and operates seven manufacturing facilities and partners with more than 865 dealers worldwide to deliver a wide range of temperature control units, financial solutions along with maintenance programs, accessories and monitoring equipment to keep units operating efficiently and safely.

Frostaire

With years of experience and research into the requirements of the direct drive refrigeration market, FROSTAIRE have become the supplier of choice for operators requiring powerful yet fuel efficient refrigeration systems. Stringent legislation is in place for the delivery of temperature sensitive goods therefore accurate control of the load space temperature is essential. Our extensive range has evolved from investigating the everyday complications of delivering temperature sensitive goods efficiently in vans, box bodies or multi compartmented multi temperature vehicles.
